

# Welding Certificates – 24 credit hours

## ABOUT

The Welding Program challenges students to master the theoretical and manipulative skills and competencies set forth by the National Center for Construction Education and Research (NCCER) and the American Welding Society (AWS). Students practice several different types of manual welding and learn the technical and scientific aspects of the following welding processes: SMAW, GMAW, GTAW, and FCAW. Students receive NCCER Level 1 certification in each program. Successful completion of all three programs will give the student NCCER Welding Levels 1 and 2.
